

BV 4 DP

Heavy Duty Brick Vent

Application:

Can be made in any size, width or height as well as 4" or 8" in depth. Blades are overlapping with storm stop at top. Head and sills have beaded drips, and the sill contains a high water stop at rear. All these features lead to the maximum stormproof protection possible. Vent shall be able to support a uniform load of 12,000 lbs. per linear foot

Material:

6063-T5 .125" thick aluminum Head & Sill with
6063-T5 .125" thick aluminum extruded blades.

Sizes:

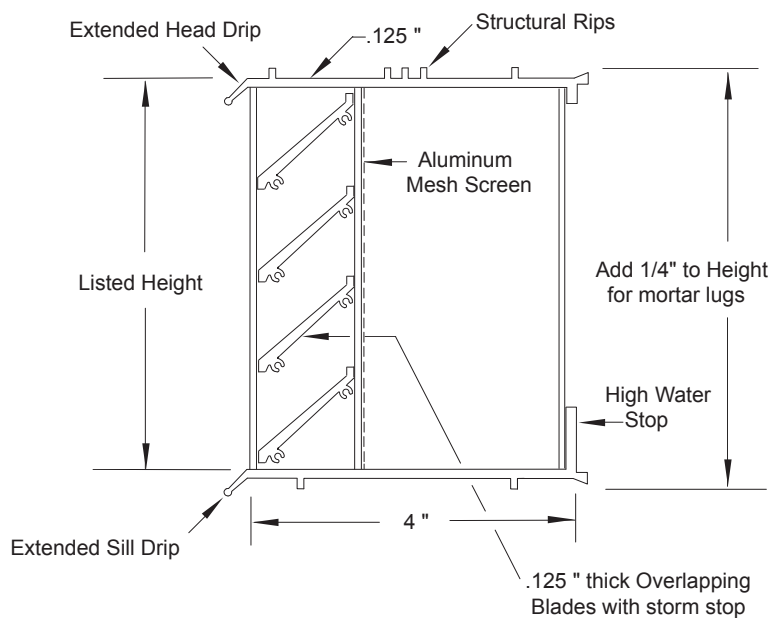

See price list for standard sizes. Custom sizes should be ordered by opening size.

Construction:

Blade angle approximately 45 degree angle
Blades spaced for maximum performance

Finishes:

Standard Mill Finish
Clear Anodize
Prime Coat
Baked Enamel Finish
Bronzed Anodized Finish
